

Analysis on the Basis of Race

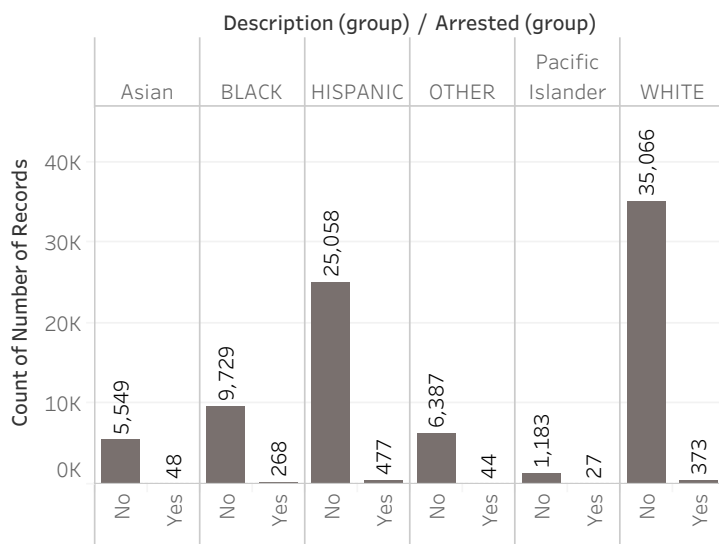

Comparison of Males and Females Being Stopped Across each Demographic

Regardless of race or ethnicity, males were stopped at a much higher rate than females, which may suggest that men were more reckless drivers, police officers were more lenient on women.

Comparison of those Arrested After Being Stopped For Each Demographic

Blacks, Hispanics, and Pacific Islanders were all more likely to be arrested than Caucasians. While only around 1% of white individuals stopped were arrested, a little over 2% of these minorities were arrested. The sample size may be too small to mean there is any prejudice.

Number of People in Each Demographic Searched After Being Stopped

Minority groups (Black and Hispanic) were searched at a higher rate than Caucasians. 9.58% of African-Americans and 5.31% of Hispanics were searched after they were stopped, while only 2.37% of Caucasians were searched. African-Americans are 5 times more likely to be searched than Caucasians when they are stopped. This could be evidence of racial prejudices.
